EDUCATION

MTech in CSE
Delhi Technological University 2019-21

B.E in IT
SVITS Indore 2014-18

SKILLS

Java • Spring Boot • Angular • Software Design • DSA • Object Oriented Design • Full Stack Development • UiPath Automation • SharePoint • Salesforce form • GenAI

Git • Jenkins • GitHub Actions • Docker • Kubernetes
MySQL • Sybase • AWS

ACHIEVEMENTS

GATE qualified engineer, demonstrating strong fundamentals in engineering and problem-solving.

AWS Certified Cloud Practitioner, with knowledge of cloud concepts, AWS services, security, and pricing models.

WORK EXPERIENCE

Senior Software Engineer
UHG Optum, Gurugram — 2025 - Present

Worked on the LINX PLM project, a legacy desktop application used by 10,000+ users, contributing to its modernization and migration to a new technology stack.

- Played a key role in transforming the application to Java Spring Boot microservices and Angular, improving scalability, maintainability, and user experience.
- Designed and developed solutions integrating multiple databases and multiple enterprise systems/projects.
- Implemented integrations with SharePoint and Salesforce, automating workflows to minimize manual operational effort.

Software Engineer
UHG Optum, Gurugram — 2021 - 25

Worked as a full-stack engineer, contributing across the full development lifecycle from requirement analysis and system design to implementation and production support.

- I have been working on Java Spring Boot microservices and REST APIs.
- Creating UI pages using Angular, with integration of shared/common libraries.
- Using tools such as Git, GitHub Actions, Jenkins and Kubernetes.

PROJECTS

LINX PLM
Angular 19, TypeScript, Java Spring boot, OIDC/SSO, Microservices, Sybase

- Migrated and modernized a legacy healthcare PLM platform to Angular 19 with NgRx state management and Angular Material UI.
- Implemented enterprise-grade SSO/OIDC authentication with multi-tab session sync and leader-tab token refresh orchestration.
- Integrated multiple backend microservices and cross-team APIs, enabling seamless data flow across enterprise systems.
- Built real-time WebSocket communication for event-driven updates across the platform, Supported 10,000+ enterprise users across UnitedHealth Group.

DARE (Decision Automation Rule Engine)

- Built a high-performance single-page web application that automated complex decision-making processes, ensuring regulatory compliance deadlines were met while reducing operational costs by $1.5M annually.

BH Audit Tool

- Built a backend audit automation tool integrating SharePoint and MySQL to perform script validation and compliance checks, reducing manual audit effort.
